Trustee,
Executive Committee,
Expansion Committee Chair,
Education Committee

Joan Krevlin has been involved in all aspects of project design and management since becoming a partner at BSKS Architects in 1992. Through her work as the partner-in-charge of a number of highly successful projects for New York City's Department of Design & Construction, including the Queens Botanical Garden and the New York Hall of Science, Joan has become one of the City's foremost experts in the creation of iconic public spaces. She emphasizes the seamless integration of architecture and interpretive content in her work, whether she is working on a project like the New York Hall of Science Teaching Park or the September 11 Tribute Center at the World Trade Center site. She is currently the partner-in-charge of the expansion and renovation of the NYC Department of Parks & Recreation's headquarters at Olmsted Center, and is directing design work for the Battery PlayScape at the southern tip of Manhattan.

Joan is closely involved with many of NYC's cultural and service institutions, and is currently chairwoman of the Board of Trustees for the Bronx Museum of Art. She has served on the AIA New York Chapter's Committee on the Environment and the Mayor's Green Code Task Force. She also served as an adjunct studio professor in the Spitzer School of Architecture at City College of New York.

Joan holds a Master of Architecture from Washington University in St. Louis, Missouri, where she was named a Distinguished Alumnus in 2003, as well as a Bachelor of Arts in Art History. In January 2010, in recognition of her design excellence, she was bestowed the high honor of joining the Fellowship of the American Institute of Architects.
